Meridian 501/V and 562/V RS232 Interface.

The RS232 interface for the 501/V and 562/V can be operated from any terminal which operates at 2400 baud with 1 start bit, 1 stop bit and no parity. Commands take the form of 2 ASCII characters, in some cases followed by a signed argument ('nn' below). All characters are echoed by the preamplifier. A carriage return character will execute the command, and backspace is also implemented. When a command is executed, the preamp will return 8 characters.

The following table lists the commands available.

Source Commands.

CD	Select CD source.	CR	Select CDR (500 comms only).
