

271 DIGITAL THEATRE CONTROLLER TRUE IMMERSION

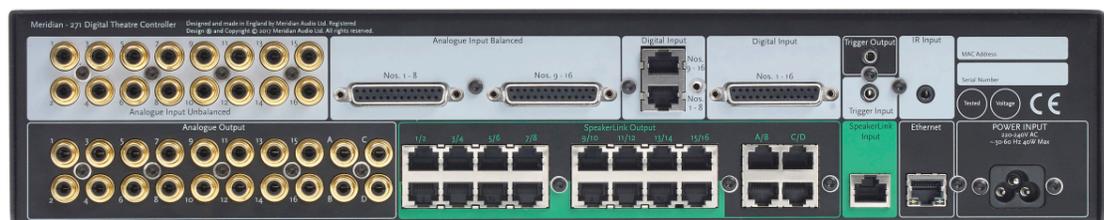

The Meridian 271 Digital Theatre Controller effortlessly integrates Meridian DSP loudspeakers into a theatre that would otherwise be unable to access Meridian's unrivalled authentic sound.

Designed to work with any processor on the market, the Meridian 271 is a High Resolution interface that allows you to design and build high performance theatre systems with up to 20 channels.

The Meridian 271 is rack-mountable and can be stacked to give 40 or even 60 audio output channels, all with Meridian's (MHR) High Resolution Audio output and a simple IP control interface.

INSTALLATION BY NV INTEGRATION

THE 271 AT A GLANCE

Compatible with any digital or analogue surround processor.

IP, IR, Trigger and Third Party control options enable seamless integration and flexibility within the home theatre.

Enables Meridian's award-winning loudspeakers to support any 3D audio format, including Dolby Atmos, Auro 3D and DTS:X.

Allows for a variety of configurations, including combinations of Meridian DSP loudspeakers and analogue speakers.

Enables access to Meridian's performance enhancing technologies, including Enhanced Bass Alignment (EBA) and Image Elevation.

Cost effective solution in home theatre / media room installation applications, enabled by Meridian's complimentary Design and Specification Service.
