

# 861 REFERENCE DIGITAL SURROUND SOUND CONTROLLER ULTIMATE PERFORMANCE AND FLEXIBILITY

The most advanced example of our ground-breaking DSP control and processing system for the very highest-quality audio performance. Featuring Meridian's patented filter which upsamples standard resolution sources to high-resolution, the 861 also adds extensive connectivity to a system. Its modular approach delivers complete isolation between analogue and digital signals for world-leading performance.

## THE 861 AT A GLANCE

A 7.1 Surround Controller with class leading audio fidelity - Meridian Room Correction for perfect sound in any room.

Unique Meridian High Resolution up-sampling to offer the best possible performance from all of your sources.

A Linear Power Supply ensures superb performance on both analogue and digital systems.

Re-clocking of the digital audio signal to remove timing errors for superior clarity and resolution.

Reference-level networked audio end-point quality for use with Roon, the high-quality streaming service.

Control 4 and Crestron control options plus RS232 and Meridian Comms.

Multiple outputs which enable the creation of both passive and DSP based systems from the same Surround Controller.

Multiple installation applications enabled by Meridian's unique Design and Specification Service.
