

G57 HIGH PERFORMANCE 2 CHANNEL AMPLIFIER UNLEASH YOUR PASSIVE SPEAKER SYSTEM

The G57 is an award winning high resolution power amplifier. Derived from the same technology we use in our flagship DSP8000 this high power, ultra-low distortion, wide bandwidth power amplifier can comfortably drive any passive loudspeaker with control, fidelity and authority.

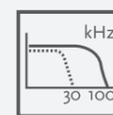

THE G57 AT A GLANCE

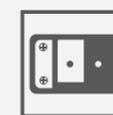

2 x 200W continuous amplification driving both channels.

Double skinned metal and glass construction.

1-100kHz frequency response \pm 2dB – Perfect for high resolution audio.

Compact and easy to install with optional rack mount kit available.

RCA and XLR analogue inputs.

Multiple installation applications using Meridian's unique Design and Specification Service and a perfect complement to any passive loudspeakers.
