

# UHD722 HDMI PROCESSOR

## ULTRA HIGH RESOLUTION AUDIO

The Meridian UHD722 HDMI Processor is the perfect link between your Meridian system and the latest HDMI-equipped video sources. The UHD722 effortlessly splits the HDMI datastream from the selected HDMI source into separate audio and video signals; meaning that audio is sent out of the unit free from the risk of subsequent sonic degradation derived from the presence of digital video signals.

## THE UHD722 AT A GLANCE

Supports UHD, enabling the UHD722 to achieve the true audio performance potential of the latest HDMI-equipped video sources.

Features Meridian's performance enhancing technologies including DSP upsampling and apodising filters.

Seven inputs and two outputs for simple, high performance HDMI switching between sources.

Discrete and easy to install 1U form factor with rack kit.

Re-clocking of the digital audio signal to remove timing errors for superior clarity and resolution.

Multiple installation applications in home and commercial environments enabled by Meridian's unique Design and Specification Service.
