

MERIDIAN BRINGS EXCEPTIONAL AUDIO PERFORMANCE TO ISE 2019

January 2019

MERIDIAN BRINGS PREMIUM AUDIO PERFORMANCE TO ISE 2019

Meridian Audio is taking the lead in High Resolution audio for the home with exceptional products and services on display on Stand 7-H240 at ISE 2019.

Exclusively at the show this year, Meridian will introduce two new products within its In-Wall Loudspeaker range. Characterised by their high SPL's and strong bass performance capabilities, the DSP640.2 and DSP520.2 are the first loudspeakers to be powered by the all new Meridian 'CLASS-M' DSP engine. Both models are also first to integrate Meridian's 'DYNAMIC' Hi-Res amplifiers. These new in-walls boast up to four power amplifiers per speaker and a higher output for more authentic, impactful sound. They can be used as a full-range loudspeaker with no need for an additional subwoofer and offering greater flexibility. With the latest Meridian technologies, only 100mm mounting depth and high fidelity, the new in-wall products are perfect for delivering high quality, lifelike sound discretely in any media room or home cinema.

Attendees will also have the chance to experience Meridian's innovative, brand new 210 Streamer. This versatile product is designed to help integrators meet client demand for reliable, high quality audio streaming throughout the home, with minimal fuss and with maximum quality.

The 210 can be connected over Bluetooth or Wi-Fi to any smart phone or tablet, with volume and playback controls synchronised between streaming apps and the Meridian system. Supporting Spotify Connect, Apple AirPlay, Bluetooth and Roon, as well as offering DLNA / UPnP compatibility, the 210 can also be connected directly to a pair of DSP loudspeakers or to any system via a SpeakerLink input for ultimate flexibility. With its built-in Master Quality Authenticated (MQA) decoder and Meridian High Resolution (MHR) audio, the 210 is capable of delivering flawless, studio master quality MQA encoded music without degradation or loss in quality.

Bringing class leading performance to the forefront, Meridian's unmatched 200 Series will also be on show, featuring the 251 Powered Zone Controller, 218 Zone Controller, and its 258 Hi-Res Eight Channel Power Amplifier.

Aside from the range of audio products on show, Meridian staff will be on-hand to discuss the professional services available to integrators. Thanks to its collaboration with award-winning The CEDIA Designer (TCD), Meridian now offers its dealers access to a Meridian-supported version of TCD, saving valuable design time and cost. This option provides CAD drawings with 3D drawings, seat positioning, renderings, as well as higher rendered channel count speaker layouts. Projector throw and offset calculations, screen size recommendations, all in alignment with industry standards.

Dealers can still use Meridian's complimentary tailored Design and Specification Service, when specifying Meridian audio products on whole home and superyacht projects. To begin the process, integrators simply need to provide Meridian with a plan of the room, house, or room dimensions. The service also includes several Meridian-distributed products, from brands including Barco Residential, Display Technologies, and Cinema Acoustic Treatment Systems.

As part of the CEDIA Training programme at ISE 2019, Meridian's Education Manager, Hugo Fitzjohn, will host Making Multi-room Audio a Better Profit Stream for Your Business. Taking place on Thursday 7th February from 14:00 – 15:30, the talk will consider how on-demand streaming services provide a great

opportunity for integrators to significantly improve the experience for their customers, whilst increasing profitability. Hugo will examine the size and shape of the market space and investigate common service providers and the options to integrate these services into multi-room systems. ABOUT MERIDIAN AUDIO

Since 1977, Meridian Audio has been crafting innovative, elegant, high performance audio solutions. From its flagship DSP loudspeakers with integrated amplification, to its discreet and powerful range of in-wall loudspeakers, Meridian delivers easy to install, high resolution audio systems for home cinemas and whole home solutions. The Meridian Audio experience is available in the latest models from Jaguar Land Rover, thanks to a collaborative partnership between these two leaders of British innovation and engineering. Meridian's renowned audio quality has also extended to new markets including consumer electronics through a Partnership with LG (LGE), and marine and airline, ultimately transforming the way people experience sound, wherever they are.
