

MERIDIAN AT CEDIA EXPO 2019 – BOOTH 3030

MERIDIAN AT CEDIA EXPO 2019 THE PIONEERS OF HIGH RESOLUTION AUDIO BOOTH 3030

August 2019

Boasting outstanding design and performance, Meridian's range of audio solutions challenge conventions and redefine how people experience sound. At CEDIA Expo 2019, attendees will have the opportunity to experience Meridian's range of High Resolution audio systems in action with Barco Residential on booth 3030.

Meridian will be providing powerful audio to two areas of the Barco booth. It's 9.4 digital theatre will feature nine of the all-new **DSP640.2 In-Wall Loudspeakers**, delivering an unchallenged audio experience at the show. Powered by Meridian's exclusive 'CLASS-M' DSP engine and integrated with 'DYNAMIC' Hi-Res amplifiers, the DSP640.2 is perfect for delivering Meridian's renowned audio quality discreetly in any media room or home cinema. Together with Meridian's 271 Digital Theatre Controller and four powerful DSW Subwoofers, the Barco theatre will provide an unmatched home entertainment experience.

Elsewhere on the booth, the integration zone will feature four of the new **DSP520.2 In-Wall Loudspeakers**, the first full integrated demonstration of the new Architectural loudspeakers in the US. This new model boasts a double precision Aux filter to improve resolution on low frequencies, as well as built-in dynamic bass protection technology to maximise bass extension, achieving optimum audio. The loudspeakers will be paired with a 218 Zone Controller, which can be integrated with any existing passive loudspeaker system, adding power and performance for truly impactful sound.

Meridian products can also be experienced with Josh.ai (Booth 4319). Here, attendees can see and experience the standout M6 Loudspeakers, which deliver a level of performance that is unsurpassed by traditional speaker design.

As part of the CEDIA Training programme at the show, Meridian's Education Manager, Hugo Fitzjohn, will be leading the session on Delivering success with Meridian 200 Series and Multi-Channel Solutions.

Taking place on Wednesday 11th and Thursday 12th September from 1-4pm, this session will be delivered in two parts, the first looking at how Meridian can deliver unique solutions for immersive audio systems and how to successfully enhance the profitability. In the second half, Hugo will be demonstrating Meridian's 200 Series product range, including the new 210 Streamer, and how to configure these models to guarantee install success.
