MERIDIAN

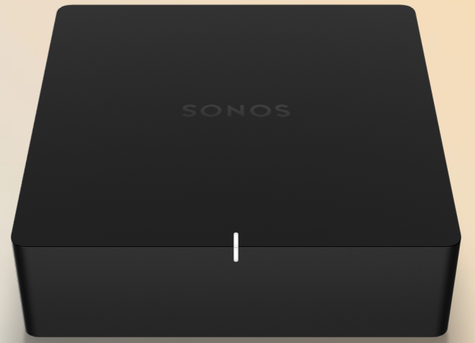

Works with

SONOS

SONOS APP, MERIDIAN SOUND

Meridian products can be integrated into a Sonos Home Sound System to allow the Sonos app to stream audio seamlessly to the Meridian product while bidirectional communication between Sonos and Meridian allows for intuitive and flexible control options.

THE HARDWARE TO CREATE THE CONNECTION

The Meridian 218 Zone Controller allows Sonos to be used with Meridian loudspeakers.

The Meridian 251 Powered Zone Controller provides the option to use passive loudspeakers of any other make.

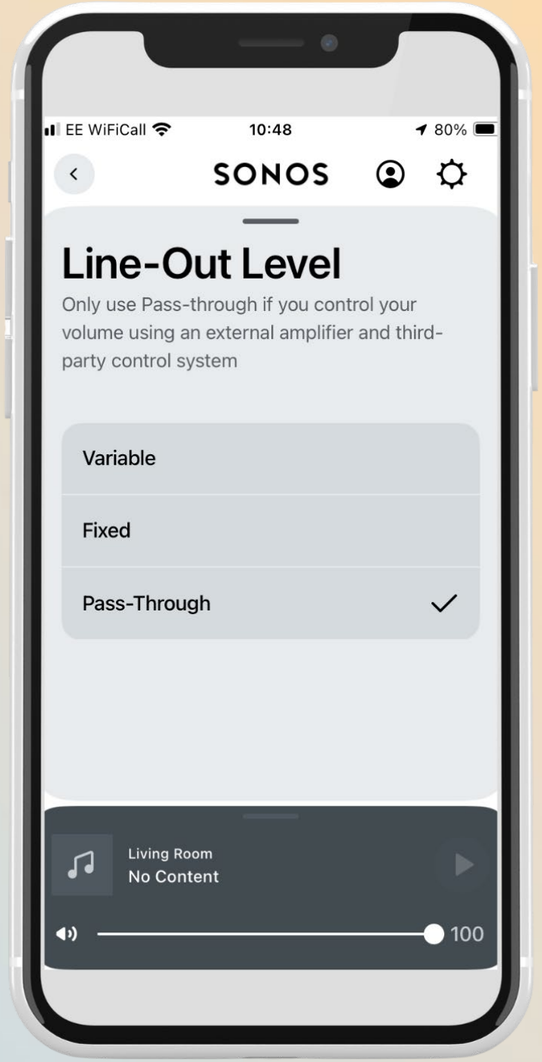

PLUS ONE OF THESE...

Use either a digital interconnect cable or an optical cable (if the Sonos device has an optical output) to connect the Sonos device to the Meridian product.

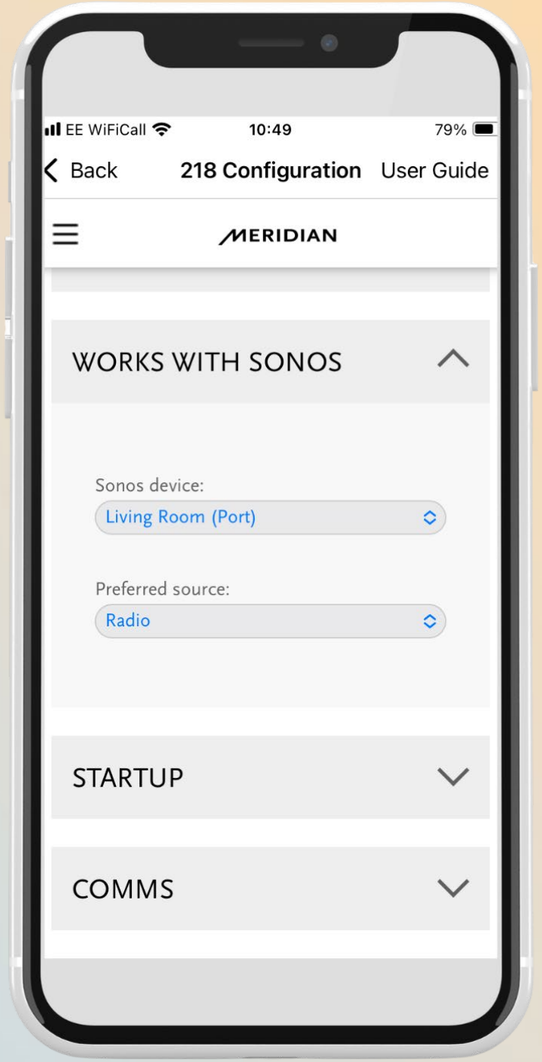

SONOS APP SET-UP

Within the Sonos app, set **Line-Out Level** to **Pass Through.**

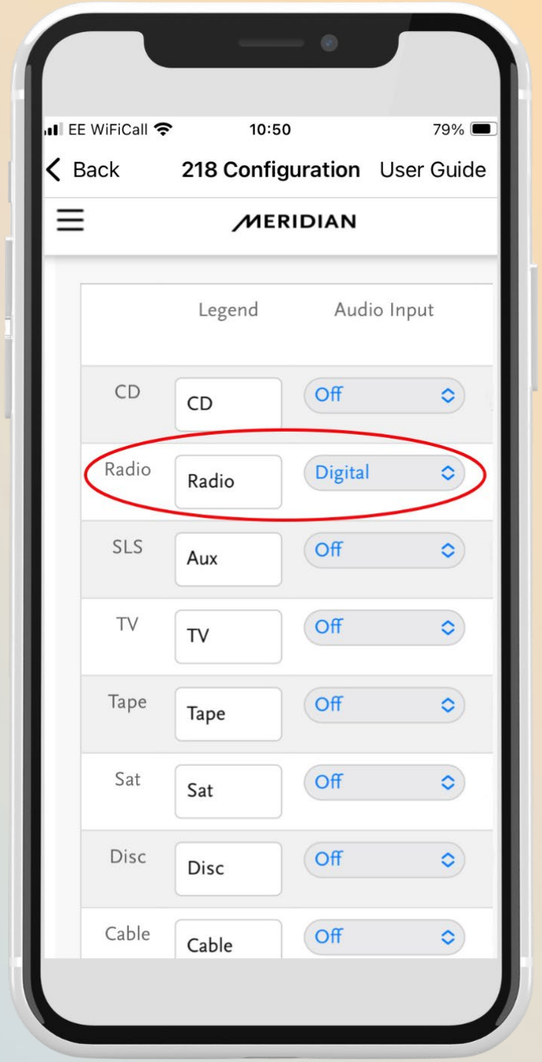

MERIDIAN CONTROL APP SET-UP: STEP 1

Within the Meridian Control app, open the dropdown for **WORKS WITH SONOS**.
Select the Sonos device which is connected to the Meridian product and choose a source to be used.

MERIDIAN CONTROL APP SET-UP: STEP 2

Move to the dropdown for **SOURCES** and assign the source to the **Digital** or **Optical** input – whichever is being used.

MERIDIAN CONTROL APP SET-UP: STEP 3

Tap on **Store Settings** and you're ready to go!
